

THE \$LIGER TEAM

\$LIGER

7 CONTINENTS. 7 FEATURES. 7%TAX

Abstract

Since the crypto bull run of 2021, there has been a surge of activity and interest on the Binance Smart Chain network.

Spearheaded by SAFEMOON, we are now witnessing hundreds of projects being launched every day that are each wanting a seat at the BSC marketplace table.

All these projects are competing, and the noteworthy ones have offered a unique selling point that makes them stand out above the rest.

\$LIGER is a solution that combines the seven best protocols in the BEP-20 token crypto space, to create a truly powerful crypto: LIGER.

What is \$LIGER?

Digital Cryptography: Powering Data for the new equity \$LIGER | Your new PET in the METAVERSE | \$LIGER is a fresh and innovative ecosystem that is aiming to bring accessibility to crypto. Powered by LigerToken, LigerNFT & LigerVerse which utilizes 7 strong protocols, this is truly a place for everyone. Our ultimate goal is to bring more people into the wonderful world of crypto, and that is why our mission is to develop and curate dApps that focus on low-fees and usability.

Features

The seven features that \$LIGER combines are:

- *Burn*
- *Auto-Buyback*
- *Auto-Reflection*
- *Charity*
- *Auto-liquidity*
- *Marketing & Development*
- *Liger Games*

Together the protocols that realize these features provide a token that is unique and a worthwhile investment. Lastly, because we take a cut of transactions and put that towards the planet and humanitarian charities we are striving towards a net- positive environmental impact to help offset the energy concerns that come with cryptocurrencies.

THE \$LIGER TEAM

Tokenomics

Each transaction is taxed 7% which is split into seven equal portions and divided across the seven features.

On buys/sells, 1% of the transaction is put into auto-liquidity, 1% is reflected as BTCB and 1% is pulled into the buy-back side-pot. The rest of the taxed amount is then split evenly across the remaining protocols (burn, charity, liger games, and marketing).

Buybacks are manually initiated at regular intervals and during the buy back period the sell transaction is automatically set to 14% for 30 minutes after buy back.

ASIA: Burn

A portion is permanently burnt directly to the dead address. This makes the token truly hyper deflationary, reducing the supply over time which results in the value and demand of your tokens rising.

AFRICA: Charity

A portion is used to donate to charities that the development team and community feel strongly about.

NORTH AMERICA: Bitcoin Reflection

A portion is reflected to every existing holder based on the amount of the total supply they are holding in BTCB. This means just by holding \$LIGER you earn an interest yield automatically in BTCB straight into your wallet.

SOUTH AMERICA: Auto Liquidity

A portion is used to increase the size of the liquidity pool. This means as time progresses, the price impact of large sells goes down. This helps alleviate some of the pressure whales can put on projects, as it creates a solid price floor meaning everyone's wallets retain value.

THE \$LIGER TEAM

ANTARCTICA: Auto Buy-Back

A portion of the transaction is stored inside the contract. This portion is then used to purchase back tokens after every buy/sell. The purchased tokens are then used to liquidate cross chains for \$LIGER in polygon, ethereum.

EUROPE: Marketing & Development

A portion is sold into BNB and sent to a marketing wallet. These funds are solely used for business & marketing purposes, helping spread the word of \$LIGER so that more potential investors join our movement.

AUSTRALIA/OCEANIA: Liger Games

\$LIGER is all about gamefi and metaverse. A portion is held in a wallet to accelerate liger games in the future. A play to earn mechanism.

THE \$LIGER TEAM

The Contract charges 7% buy/sell tax for every transaction out of which 1% is auto liquidated, 1% is auto-reflection in BTCB, 1% auto buy-back & 4% is sent to the DEV wallet address 0xA3E01842f2d12b49F92915abF4de8C6F39519d3A

This 4% is redistributed to 4 different wallets to maintain the protocol (burn, charity, liger games, marketing & development)

Burn wallet: 0xe6539D4c52a5d4663427a63080e6eeaf84B0f30C

Charity wallet: 0xdD2f13C9C2cCda0b7F7e95983862cfd1d82B67d4

Marketing & Development wallet: 0x771A7c60A100fa5561907C0DB8E10fBb9744aFf2

Liger Games Wallet: 0xb0eD39aD5D4b9ca9aD1b348a00c3090bB9E3f44e

ANTARCTICA: AUTO BUY-BACK

Our Antarctica protocol is our buyback function embedded inside the contract. A cut of tokens is collected by the contract and sold into BNB to buyback tokens at a later stage.

It collects 1% taxed tokens on each transaction, storing them inside the contract, the buyback function is manually triggered on the contract and during the buybac time the sell tax becomes 14% for 30 minutes the buyback is triggered.

The buy back \$LIGER tokens are further used in the future to liquidate \$LIGER into different chains such as Polygon & Ethereum.

Why is this good?

Since the bought tokens are liquidated into other chains, the value proposition and long term stability and availability of \$LIGER is holded for good making \$LIGER a pure investment. In addition, the buyback produces a large green candle and a spike up in price. This not only generates hype for the project, but it forces people who have been closely watching the project to reconsider why they did not buy in sooner.

NORTH AMERICA: Bitcoin Reflection

Our NORTH AMERICA protocol is our BTCB reflection function. This means that peoples btcb balances grow automatically by just holding \$LIGER token.

BTCB CONTRACT ADDRESS: 0x7130d2A12B9BCbFAe4f2634d864A1Ee1Ce3Ead9c

Just add the above contract to your wallet and hold \$LIGER to get rewarded in BITCOIN.

It takes 1% of every transaction and reflects this back to every single holder of \$LIGER in BTCB. The amount everyone receives from this 1% reflection is based on the total supply of \$LIGER that they hold.

Why is this good ?

This means just by having a balance of \$LIGER, you automatically will gain an interest yield over time in BTCB. It also encourages people to increase their holdings with more buys over time, as the interest yield is based on how much of the supply they own.

Everyone wants BITCOIN, \$LIGER makes it possible.

AFRICA: CHARITY

Our AFRICA protocol wallet gets 1% of every transaction from our DEV wallet manually and puts it towards charitable efforts, so that investing in \$LIGER is investing in the future of humanity.

\$LIGER is more than just a personal financial opportunity, and it aims to not only help the world but inspire competitors to rally look to placing wealth where it matters the most.

We pledge to invest in areas such as, but not limited to:

- *Poverty alleviation*
- *Lion and Tiger reserves*
- *Cancer research*
- *Emergency services*
- *And everything in between*

Donations will be transparently done, announced and authenticated.

SOUTH AMERICA: AUTO - LIQUIDITY

Our SOUTH AMERICA is our auto-liquidity function. This function automatically grows our liquidity by taking 1% of each transaction and putting it towards the liquidity pool.

Why is this good ?

Having more liquidity means that swapping \$LIGER in and out of the pool swings the price less, effectively raising the price floor.

This makes \$LIGER progressively stronger against selling, resulting in your wallets retaining their value more effectively.

EUROPE: MARKETING & DEVELOPMENT

Our EUROPE protocol is a way to provide funding to the \$RAINBOW project.

Instead of giving tokens for marketing and development at the start, we've decided to integrate a protocol that gives 1% of every transaction to the DEV wallet which is intern sold for BNB and sent to the marketing wallet address. The funds for this function will be primarily used to market \$LIGER, spreading the word of our project to bring in new investors.

AUSTRALIA/OCEANIA: LIGER GAMES

\$LIGER starts its journey with its unique 10000 Liger Inu FOUNDER NFT's as an entry point to participate in the LIGER token. LIGER GAMES are our long term vision to help players turn their NTF'S into action figures to play LIGER GAMES. 1% is sent to the Liger Games wallet and late distributed to ingame plates.

More about Liger Games in LIGERPAPER V2.

TOKEN DISTRIBUTION:

When \$LIGER was deployed, 70,000,000 (70 million) tokens were minted.

The contract prevents any further mints from taking place meaning that it is impossible for the supply to ever increase.

Launch Distribution:

PRIVATE SALE: 5%

PUBLIC SALE: 55%

LIQUIDITY: 30%

TEAM: 10%

365 days for decentralization: *We have locked the liquidity for 365 days on the pinksale presale and on the 366th days the liquidity LP is burned to dead wallet to make \$LIGER decentralized forever.*

ROADMAP:

It is important that we outline a paved direction for the project and what we plan to do. This is so our investors can use this as a yardstick to measure our performance to help reassure them that not only is the project alive, but it is delivering on committed work.

To prove it we have already built a data integration mechanism for defi transaction's with our DEFI DASHBOARD before launch at <https://app.ligerinutoken.com>

Q1: ESTABLISHMENT

- *Create a Telegram, twitter, reddit, instagram, github*
- *Launch the website*
- *Launch DEFI DASHBOARD DAPP*
- *Publish LIGERPAPER*
- *Host a private sale*
- *Launch NFT minting DAPP*
- *Host the public sale of LIGER on pinksale*
- *Launch to pancakeswap v2*
- *Listing on BscScan*
- *Listing on CoinGecko and CoinMarketCap*
- *Listing on secondary listing services such as CoinHunt*
- *Expand team moderators*
- *Listing on at least one exchange*

Q2: DEVELOPMENT

- *Develop NFT MARKETPLACE*
- *List on multiple exchanges*
- *Begin development on LIGERVERSE METAVERSE CLAIM LAND*
- *Reach out to other projects for cross-marketing and collaborations*
- *Hire extra programmers & experienced developers*
- *Start working on Liger Games*
- *Expand outreach and marketing strategies*

Q3: FUTURE

- *LAUNCH LIGERVERSE CLAIM LAND*
- *LAUNCH LIGERVERSE*
- *LAUNCH LIGER GAMES*
- *LAUNCH NFT TIERS*
- *LAUNCH NFT BREEDING (more in LIGERPAPER V2)*

UTILITY & FUTURE PROJECTS:

\$LIGER isn't just a token. We have big aspirations and wish to make products and platforms that everyone can use. These products and platforms will also incentivize people to acquire and invest into \$LIGER, so that we can create a brand that lasts an ecosystem that circulates wealth.

Our main project that we plan to launch is LIGERVERSE a METaverse, which you can learn in LIGER PAPER V2. Our ultimate goal is develop Liger Games a play to earn mechanism that gives value for your liger NFT's. And ultimately we see LIGER NFT's as convertible digital PET in our LIGERVERSE METaverse.

WHY OWN A DOG OR A CAT, WHEN YOU CAN OWN A LIGER.
